

7GEN BLOCKS GAME BUILDER

LEVEL 1: CREATING YOUR GAME'S "SPLASH SCREEN"!

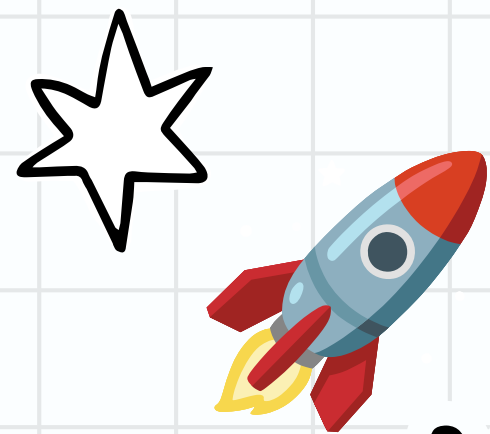

Let's design the very first screen players see when they open your game!

WHAT IS A SPLASH SCREEN? 🤔

- It's the front cover of your video game!
- It tells players the name of your game.
- It gets them hyped to press START!

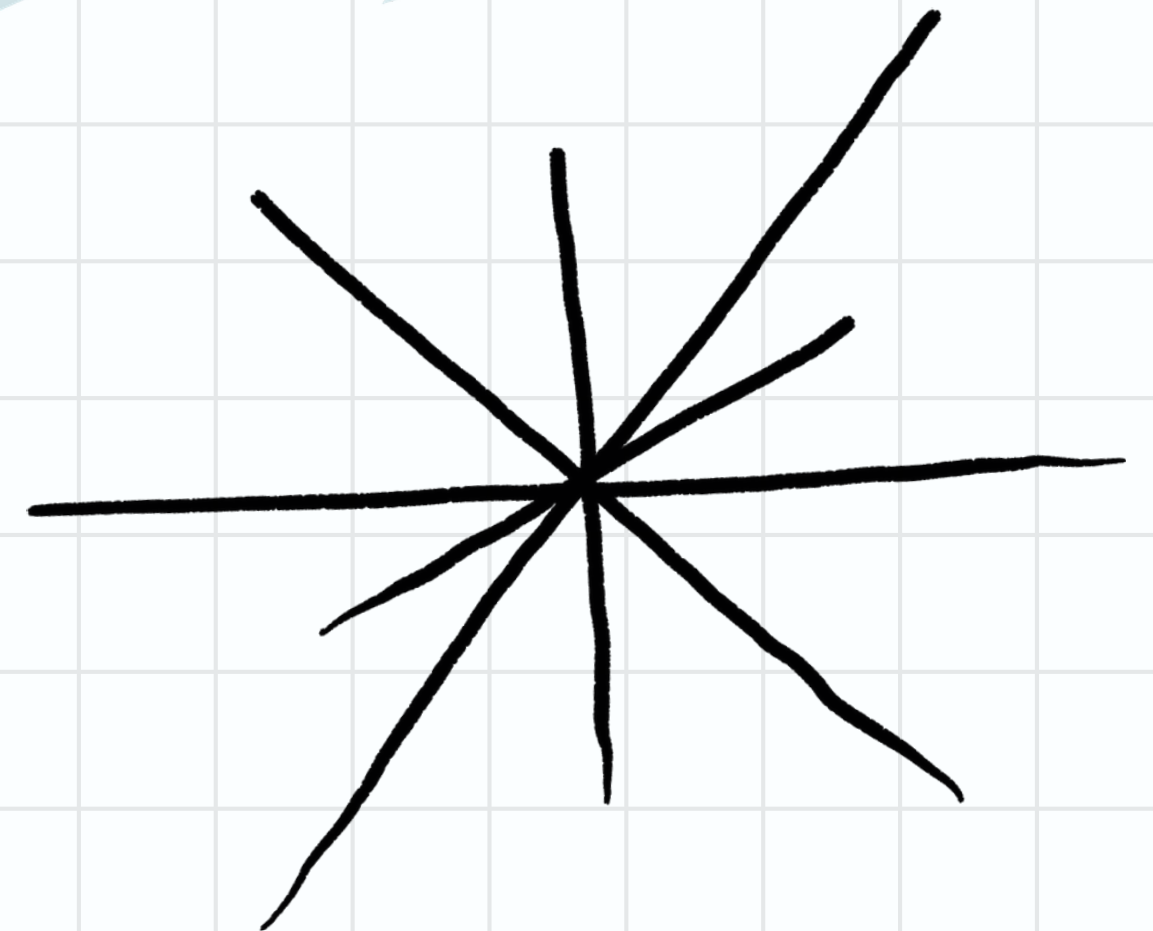

STEP 1: NAME YOUR BLOCK!

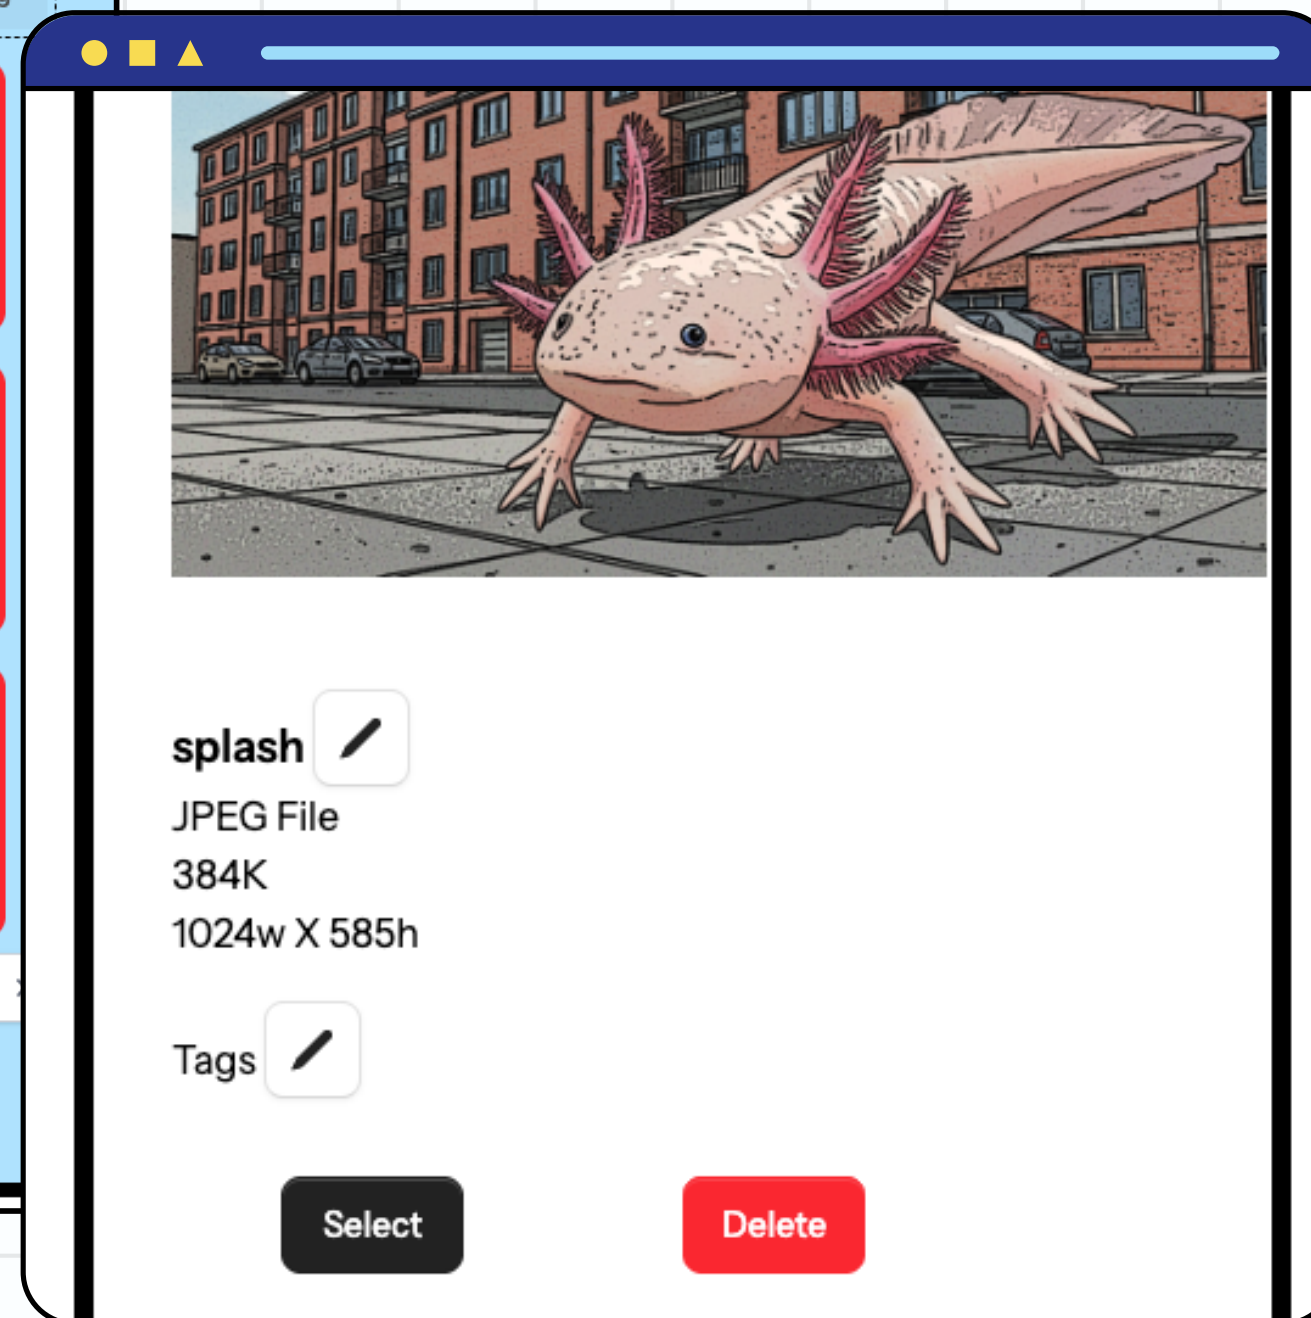

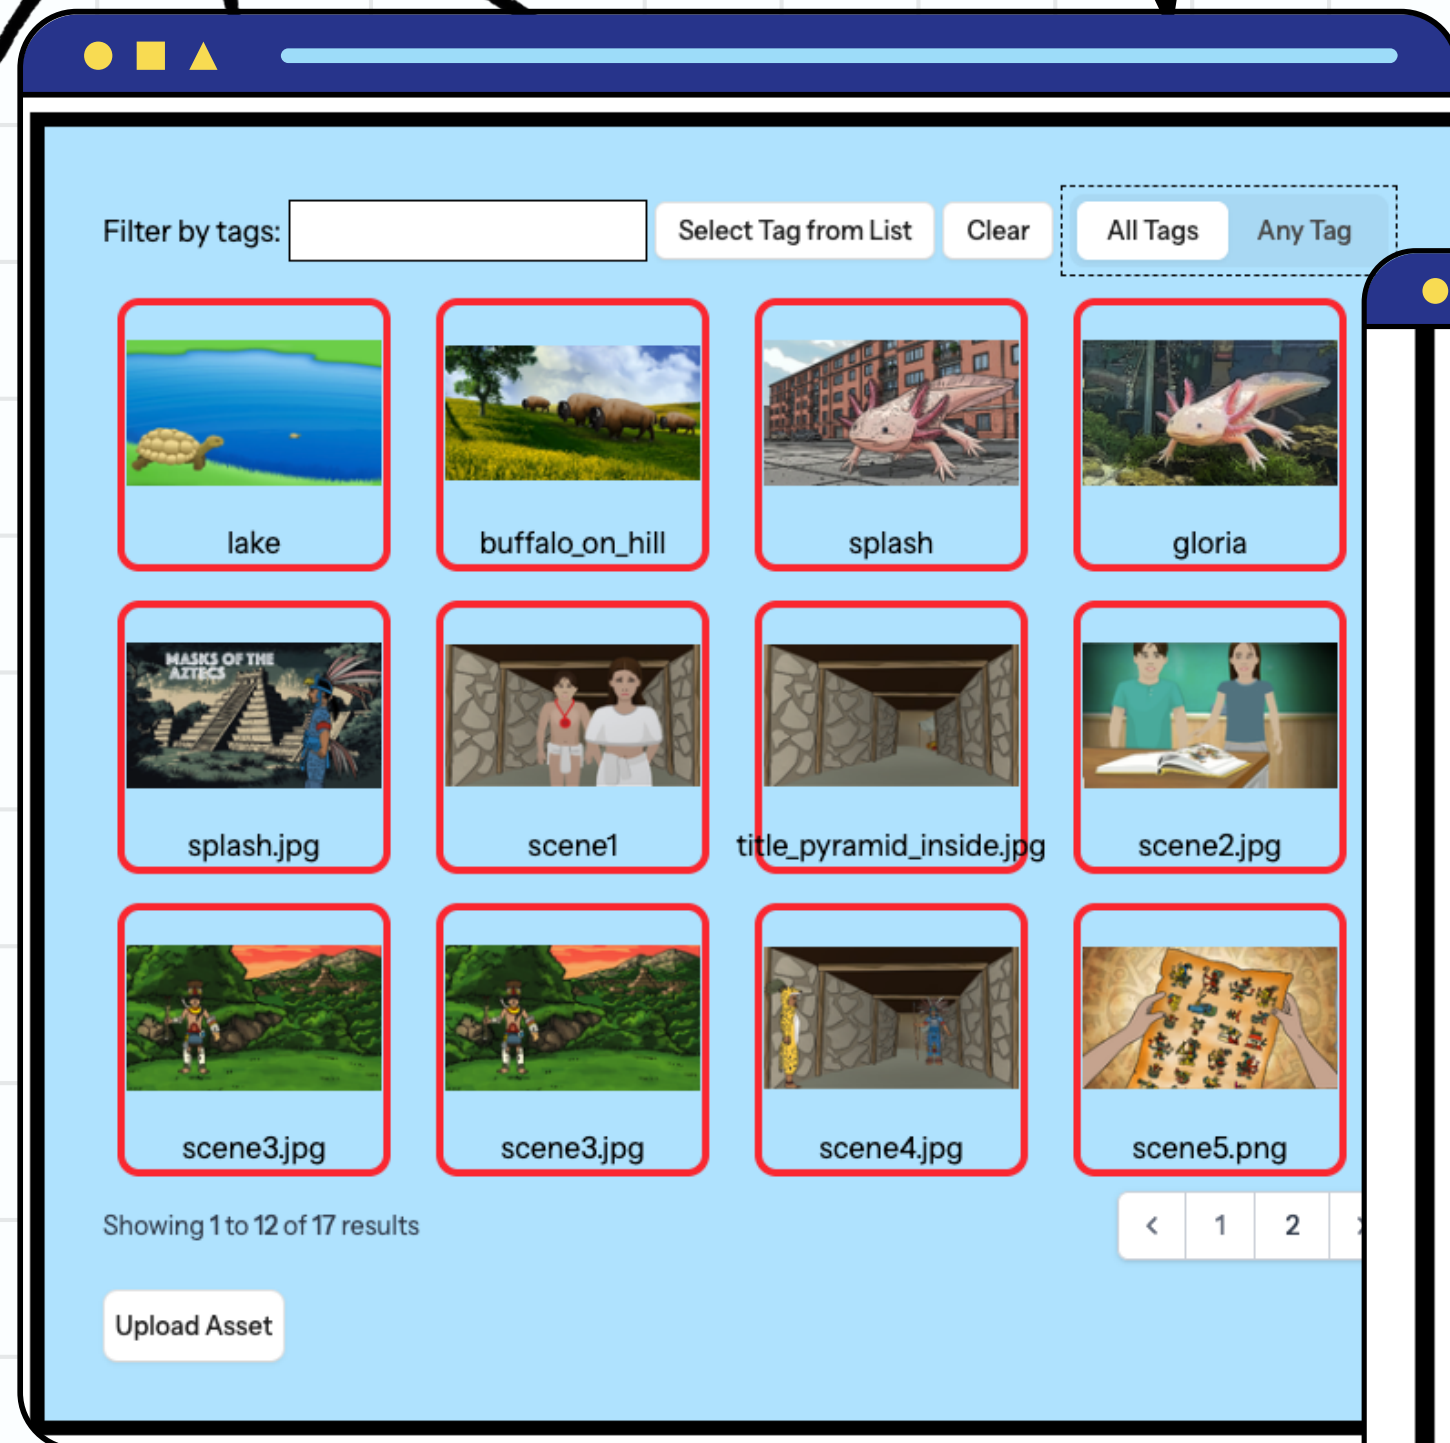

We recommend
keeping it simple—
just type splash.

CAUTION

Watch out! The computer converts
your block name into a web link. It
will automatically turn BIG letters
into small letters, and turn spaces
into underscores (_).

STEP 2: CHOOSE YOUR BACKGROUND!

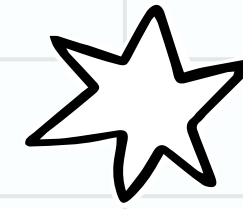

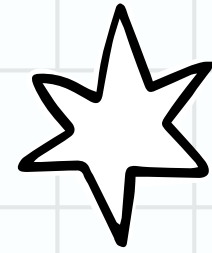

1. Click on the Asset Manager button.

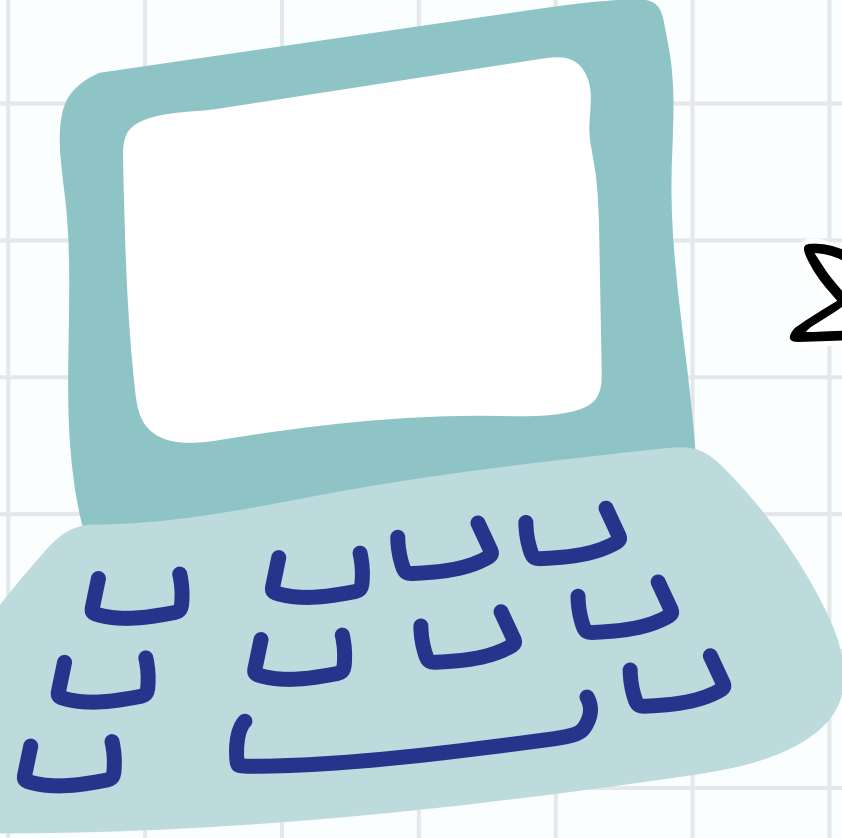

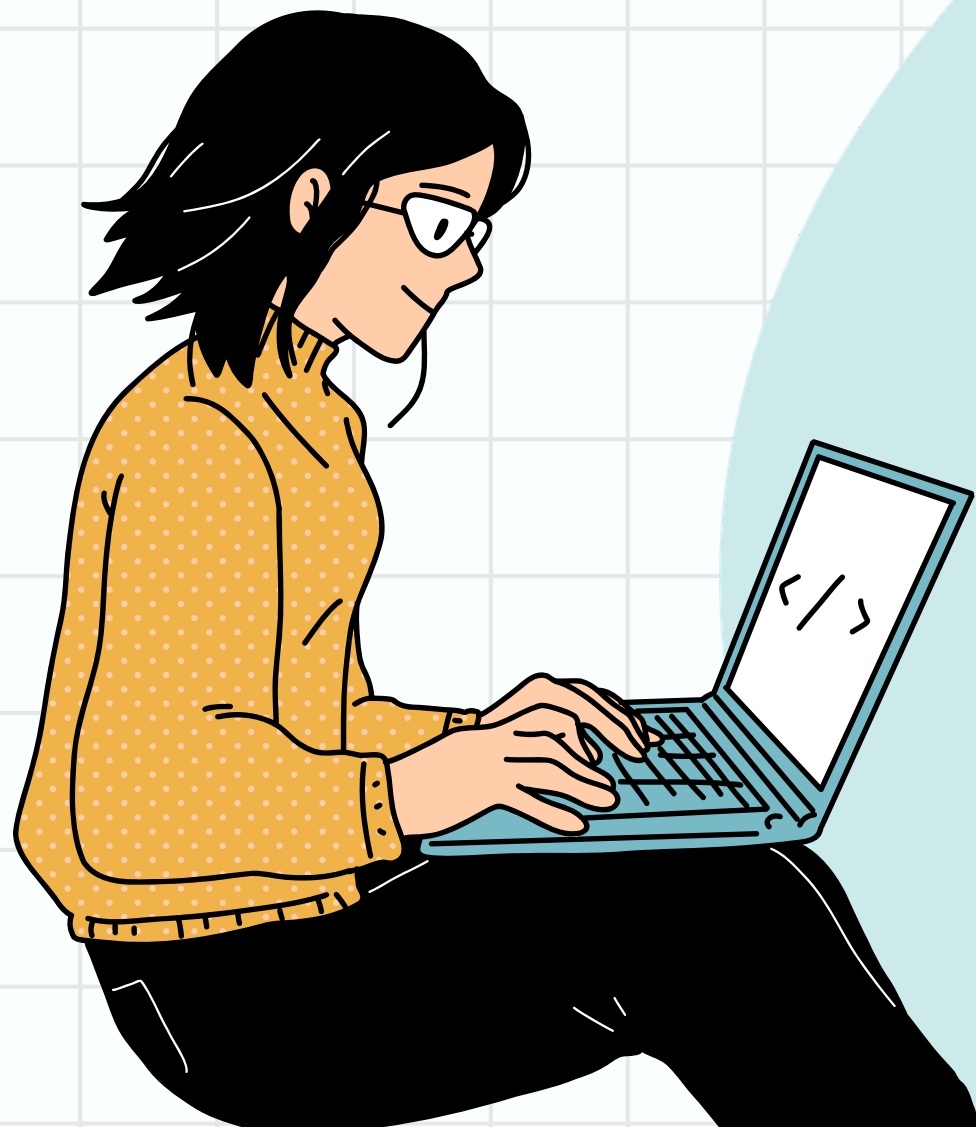

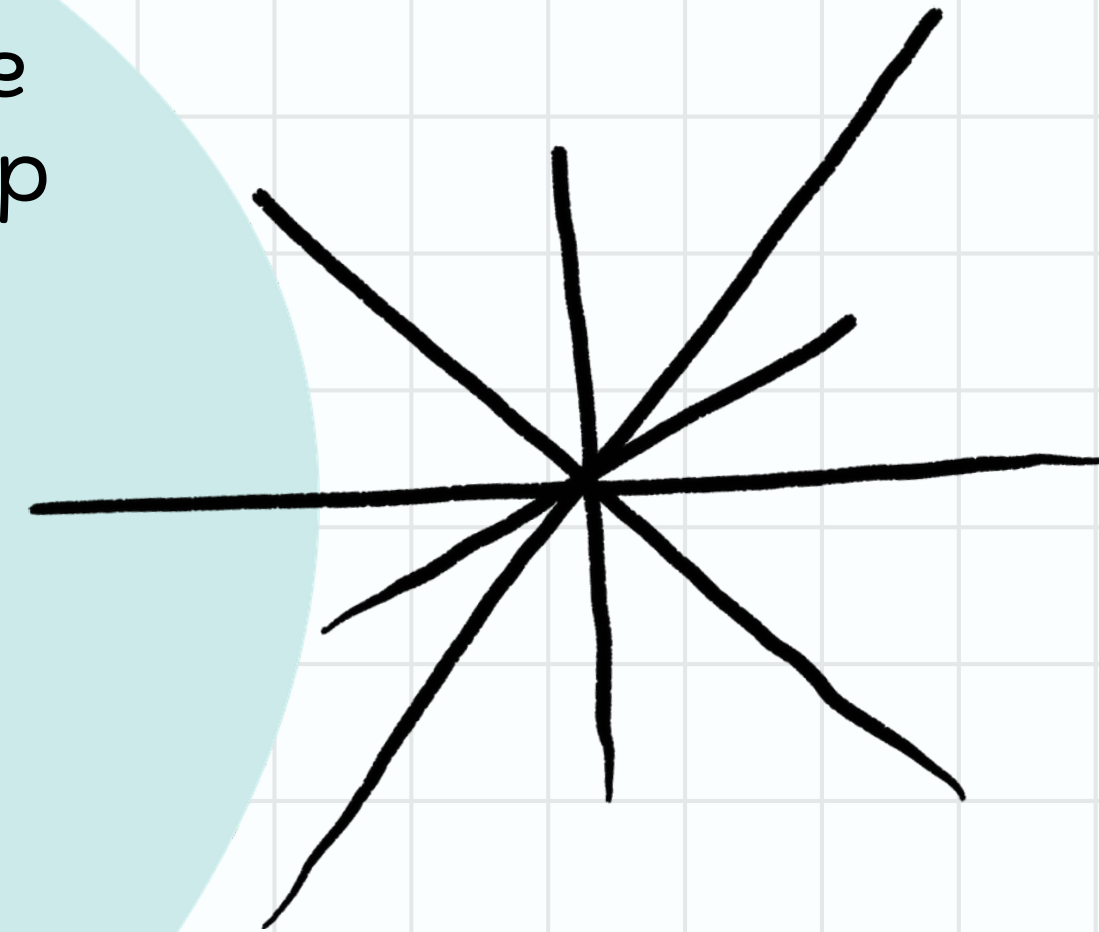

2. Pick an awesome picture from the library OR upload your own image!

3. Super Important: Once you upload your picture, you must click on it to select it!

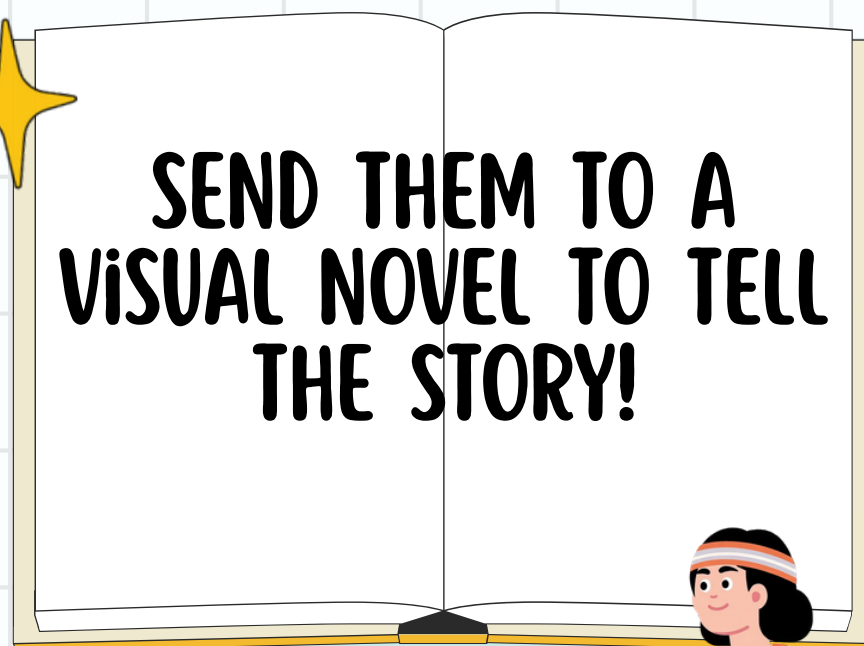

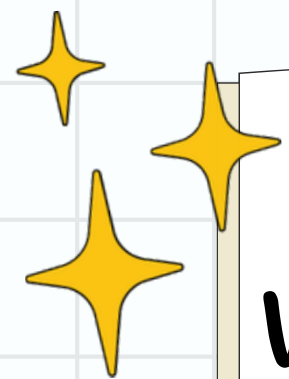

STEP 3: NAME YOUR GAME!

1. Does your picture already have the game title on it? Sweet! You can skip this step
2. No title yet? Check the "Title Text" box and type it in!
3. Make it pop: Click the color box to change your font color so players can actually read it!

STEP 4: LINK TO THE NEXT LEVEL! ✨

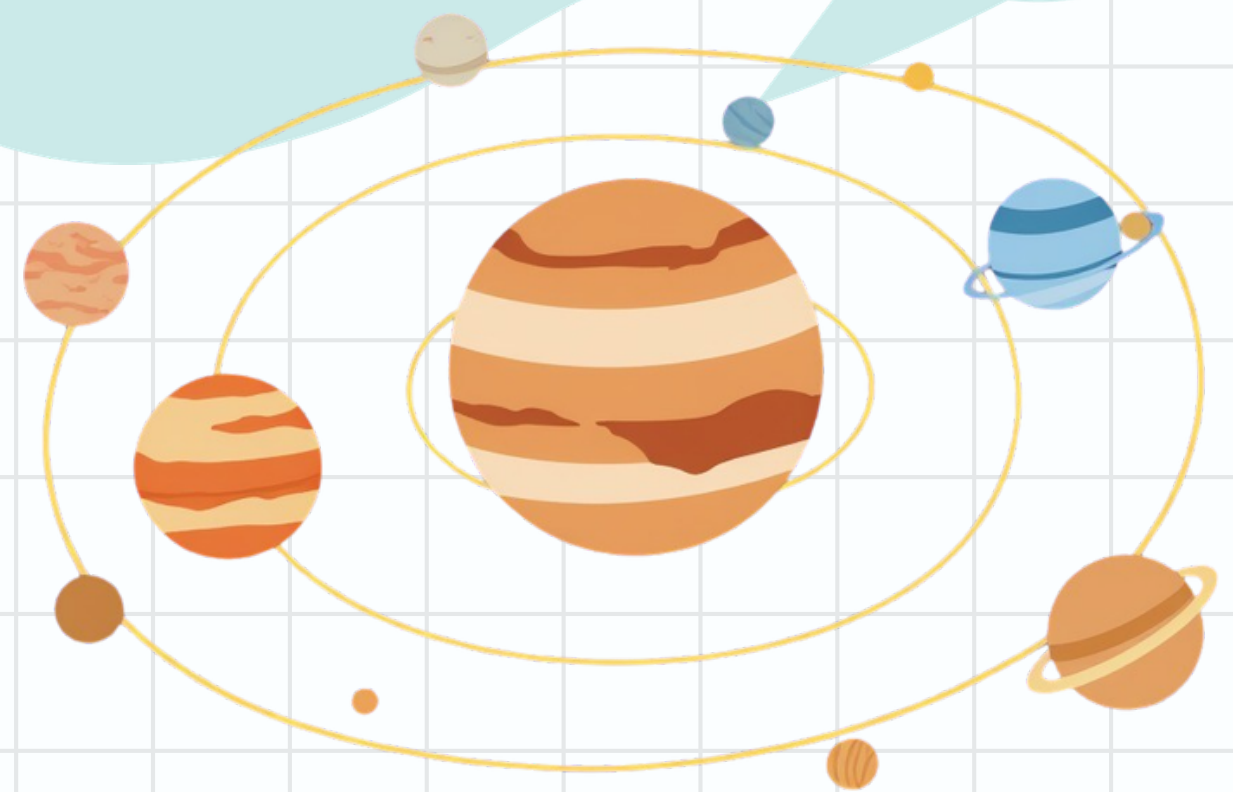

SEND THEM STRAIGHT INTO
A RUNNER GAME TO
ESCAPE A MONSTER!

Where does the player go
when they press START?

- You can link it to a block that you haven't even built yet!

SEND THEM ON A QUEST TO SOLVE
A SCIENCE OR MATH MYSTERY!

LEVEL COMPLETE!

★ YOUR SPLASH SCREEN IS ALIVE!

YOU JUST BUILT
THE ENTRANCE
TO YOUR GAME
WORLD!

Now, choose your next move:

Build the next level!

OR

Edit another game project!
